- BUG-000085257 Improve geoprocessing messages in Web AppBuilder for ArcGIS.
- BUG-000090053 The Edit widget in Web AppBuilder for ArcGIS shows incorrect formatting if there are many templates available.
- BUG-000091163 Legend: Web AppBuilder within ArcGIS Online intermittently makes a request to the legend information of a geoprocessing widget's output result.
- BUG-000096211 A blank table is displayed when the output of a geoprocessing service is a table in Web AppBuilder.
- BUG-000096711 Some values in the Summary widget of Web AppBuilder do not update when panning the map to a location that does not contain features.
- BUG-000097359 The LayerList widget in Web AppBuilder Developer Edition does not behave correctly when a map service with multiple nested sublayers is added directly to the map object as a WMSLayer.
- BUG-000097703 When both "Add result as operational layer" and "Use the drawing options of map service" are checked, the GP widget in Web AppBuilder only return the layer of result map service, not returning the operational layer.
- BUG-000097745 The Coordinate widget in Web AppBuilder does not display the coordinate system correctly while the Launchpad theme is used with the default black style.
- BUG-000098954 The Summary widget in Web AppBuilder fails to zoom to the filtered values when the basemap and the feature layer have different spatial references.
- BUG-000099707 When the Geoprocessing widget is set to synchronous execution mode constant input mode, the attribute table of the output data layer does not show any values in Web AppBuilder.
- BUG-000099763 In Web AppBuilder, specifying a URL parameter of a "Query Feature" on a polygon layer simplifies the geometry of the polygon.
- BUG-000099940 It is not possible to add new related records using the Edit widget of Web AppBuilder for ArcGIS when the fields in a related table are not nullable and are published as a hosted feature service.
- BUG-000100396 In Web AppBuilder, when adding a new record to a related table in the pop-up, the default value of the date field is the current date.
- BUG-000101074 Filters applied to a layer using the Summary widget are not removed when the Summary widget is closed.
- BUG-000101332 The Info Summary widget does not sort results alphabetically.
- BUG-000102702 An error returns when adding an intranet URL in the 'Add New Link' dialog box in the Attribute tab of Web AppBuilder Developer Edition.
- BUG-000102921 onOpen, onClose, onMaximize and onMinimize events in *Widget.js* file in custom widgets of Web AppBuilder 2.3 Developer Edition do not work.
- BUG-000103480 Using a geoprocessing service/widget in Web AppBuilder fails in IE11 with just an "error" message but not in Chrome and Firefox.
- BUG-000103546: When a Web AppBuilder application is built from a web map where elevation service analysis had been performed on a drawn input point, the Analysis widget freezes after successfully running an elevation service tool once.
- BUG-000103617 Web AppBuilder in ArcGIS Online: Select widget Export to CSV operation duplicates all of the columns from the attribute table.
- BUG-000103677 Related records display the coded value in the Web AppBuilder pop-up rather than the domain description.
- BUG-000103767 In the Smart Editor widget in Web AppBuilder (Danish language settings in ArcGIS Online), where the Danish word for "delete" should display, it says "download fuldført" (download complete).
- BUG-000103768 The Query widget in Web Appbuilder creates duplicate fields when exporting the result as a CSV file.

- BUG-000103885 Editing the symbology of a feature service in a Portal for ArcGIS web map causes the Near Me widget to fail to return results in Portal's Web AppBuilder for ArcGIS.
- BUG-000103909 The Basemap Gallery widget documentation is unclear about which types of services (tiled versus dynamic, and image services versus map services) are supported.
- BUG-000104093 In the Summary widget for Web AppBuilder for ArcGIS, when working with Summary Layer Filter Field based on a field, the counts and values returned are sometimes over the actual expected numbers.
- BUG-000104094 Near Me widget results are no longer accessible using Tab key.
- BUG-000104277 When creating a new basemap from a dynamic map or dynamic image service, the Basemap Gallery widget returns the following error despite having the correct spatial reference, "The basemap you are adding has a different spatial reference from the current map."
- BUG-000104259 The 'Export to GeoJSON' functionality of the Query widget does not export attributes.
- BUG-000104660 Web AppBuilder has too much error checking for valid URLs as links in the header.
- BUG-000104955 Basemaps made with tile layers do not appear in the Web AppBuilder Basemap Gallery widget.
- BUG-000105012 Search widget in Web AppBuilder returns wrong location due to rounding geometry result to nearest whole number.
- BUG-000105228 When creating a new Related Record for a feature in Web AppBuilder, domains belonging to a subtype within the Related Table do not initially populate their field when that subtype is selected.
- BUG-000105374 Web AppBuilder for ArcGIS documentation for Basemap Gallery widget is unclear regarding multi-layer basemaps and required spatial references.
- BUG-000105575 It is not possible to add new related records using the Edit widget of Web AppBuilder for ArcGIS when the fields in a related table are not nullable and published as a feature service.

- ENH-000091896 Please enable time format options in the Time Slider Widget in Web AppBuilder (ex. choosing to show YYYY on the slider).
- ENH-000096775 Add 2D Full Screen widget in Web AppBuilder Developer edition.
- ENH-000097781 Allow users to choose the max numbers of records returned for the Near Me widget.
- ENH-000102509 Allow adjusting or removing the radius size at the end of the visualization trail in Web AppBuilder 3dFx widget, when Jet Trail is used as visualization type.
- ENH-000103233 Provide a setting for "Persist After Widget is Closed" in the Group Filter widget configuration window.
- ENH-000103834 Consider changing the language of "Execute" button for the Query widget in Web AppBuilder to either "Apply" or "Run."
- ENH-000104909 Documentation on the Query widget is misleading.
- ENH-000103951 Add Degree, Decimal Minutes, (DDD° MM.MMM') coordinate display unit in Web AppBuilder.
- ENH-000105004 Add marker Feature Action does not work as expected.
