

Web AppBuilder for ArcGIS Developer Edition v2.6 – List of Issues Addressed

- BUG-000084501 LayerList: Altering the ItemID of a service makes the service's item details page inaccessible from a web application created from Web AppBuilder for ArcGIS.
- BUG-000085896 LayerList: A KMZ file added to a Portal for ArcGIS web map is not displayed when shared in a Web AppBuilder application.
- BUG-000088973 Need to add the ability to define images for user generated bookmarks in Web AppBuilder.
- BUG-000089193 LayerList: The default order of RGB is displayed inversely as BGR in a legend in Web AppBuilder for ArcGIS.
- BUG-000090601 LayerList: KMZ layers are listed twice in the Web AppBuilder's layer list.
- BUG-000091567 LayerList: When using a duplicate service in a web application from ArcGIS Online, layers fail to load if one of the layers has a broken URL.
- BUG-000091969 LayerList: Operational layers do not display in Web AppBuilder when the first service added to a web map from an ArcGIS Server instance is stopped.
- BUG-000093026 LayerList: The Layer List widget in Web AppBuilder shows all layers from Living Atlas services, instead of layers seen in the view of the service added in the web map that is consumed.
- BUG-000093758 LayerList: The Layer List widget in Web AppBuilder does not honor name changes made to the sublayers of a map service in the table of contents of the web map.
- BUG-000094011 LayerList: Web AppBuilder Developer Edition v1.3 does not honor the web map settings for sublayers in a map service if the sublayers are checked or unchecked.
- BUG-000094954 LayerList: Unchecking a grouped layer with sub-layers checked and refreshing Web AppBuilder Developers Edition turns all layers off.
- BUG-000095592 Search: when using the Search widget in a web app built with Web AppBuilder, searching for a date in a Date field returns the values in Unix/Epoch time.
- BUG-000095740 LayerList: Blank (no feature) KML layers are checked on in a web map, but are checked off in Web AppBuilder apps.
- BUG-000097457 The zoom level when using the Attribute Table widget in Web AppBuilder for ArcGIS zooms to a different location compared to the Search widget, and it is harder to understand where the feature is located.
- BUG-000098771 The Delete button of the Bookmark widget in Web AppBuilder for ArcGIS provides different functionality, depending on whether bookmarks are created during setup or within the application, with no message to notify users why the different functionality exists.
- BUG-000099345 Bookmarks configured in two simultaneous Web AppBuilder Developer Edition applications affect each other if both applications are on the same browser and unless the browser cache is cleared.
- BUG-000099349 Search: searching for a location in a Web AppBuilder application does not retain the search result point when used on a mobile device.
- BUG-000099922 If both the options, '*Output may have different schema, use dynamic schema instead of predefined*' and '*Add result as operational layer*', are selected in the Geoprocessing widget, no operational layer is added to the map for the output.
- BUG-000101499 The Query widget in Web AppBuilder for ArcGIS does not honor numeric field display properties, which results in the Query widget displaying the comma separator for large integer numbers, while the same numbers displayed in the attribute table and pop-up do not display the comma separator.
- BUG-000102206 The National Oceanic and Atmospheric Administration (NOAA) Storm Reports map server does not honor the change of symbology in a web app using the Add Data widget after being modified and saved using the 'Save Layer' button in the ArcGIS Online map viewer.
- BUG-000102702 An error returns when adding an intranet URL in the 'Add New Link' dialog box in the Attribute tab of Web AppBuilder Developer Edition.
- BUG-000102711 The Search widget does not show related records if a map service is used in a web map.

- BUG-000102921 onOpen, onClose, onMaximize and onMinimize events in Widget.js file in custom widget of Web AppBuilder 2.3 Developer Edition do not work.
- BUG-000103656 When using the Situation Awareness widget in Web AppBuilder for ArcGIS to draw buffers, the Safari mobile browser draws the buffers smaller than the actual expected size to be drawn.
- BUG-000103983 When using the Near Me widget in Web AppBuilder, with a layer that is unchecked in the web map, the features stay on the map after the widget is closed.
- BUG-000104015 Related table is visible in Web AppBuilder's 'Layer List' widget even though its associated feature layer is not shared with the user viewing the application.
- BUG-000104209 When editing a web map within Web AppBuilder, warning message for reconfiguring widgets is inaccurate.
- BUG-000104617 Duplicate basemaps in the Basemap Gallery widget when configured using the Create New option.
- BUG-000104650 Web AppBuilder fails to add a new related record when multiple feature layers are referencing the same feature class.
- BUG-000104807 Applying the "Find" URL parameter in Web AppBuilder fails to display related fields in the pop up compared to the search in the normal URL.
- BUG-000105007 Edits cannot be made when using the Smart Editor widget if a map service is used in the same map as the feature service.
- BUG-000105164 The on-screen keyboard on Android devices displays briefly then disappears when clicking text fields of a widget in a Web AppBuilder for ArcGIS application configured with the Plateau theme.
- BUG-000105273 In Web AppBuilder for ArcGIS, setting the search layer of the Near Me widget to a tiled map service breaks the widget and all subsequent Near Me widgets that are added to the same application.
- BUG-000105518 When clicking on the Results of the Query widget in Web AppBuilder, "No Attachments Found" error message is displayed even though attachments are not enabled on the feature service.
- BUG-000105709 Unique values dropdown list in the Web AppBuilder Filter widget do not recognize the layer filters that are configured in the web map.
- BUG-000105771 When viewing a web app in Safari on an iOS device, expanding the Near Me widget window does not resize the text box properly.
- BUG-000105779 When viewing a web app on a mobile device, minimizing multiple widgets causes them to overlap at the bottom of the app viewer with no way to switch between the minimized windows.
- BUG-000106234 The font style of the text in the Draw widget's text preview and when drawn on the map in Web AppBuilder, the style does not match.
- BUG-000106309 Level 1 users are unable to edit public hosted feature services from the Smart Editor widget of Web AppBuilder.
- BUG-000106319 The Situation Awareness widget in Web AppBuilder for ArcGIS freezes with a large number of features.
- BUG-000106430 Keyboard disappears on android devices when trying to edit attributes from the Smart Editor widget of a Web AppBuilder app using the 'Plateau' theme.
- BUG-000106431 The Situation Awareness widget doesn't work in full screen mode in Web AppBuilder for ArcGIS.
- BUG-000106446 Time Slider widget does not display correct date when cursor is hovered away from the selected dates.
- BUG-000106554 Layers in Web AppBuilder for ArcGIS do not draw correctly after the Swipe widget is used and toggled off.
- BUG-000106671 When creating a new related record for a feature in Web AppBuilder, the incorrect domain drop down is populated if you select a subtype other than the default.
- BUG-000106778 Having the Near Me widget configured in a WAB application triggers all layers to be turned on in Internet Explorer, even if you configured the layers to be turned off in the web map.
- BUG-000106941 The Situation Awareness widget fails to load data in the Weather tab.

- BUG-000107248 The window from the Splash widget cannot be turned off using keyboard.
- BUG-000107354 Error: The Time Slider widget in Web AppBuilder shows wrong time/date.

- ENH-000094546 In WAB, while deleting bookmarks from Bookmarks widget, the map should not pan before getting deleted.
- ENH-000102686 Allow application creators to enable/disable the ability to add or delete bookmarks within the widget when using Web AppBuilder.
- ENH-000104668 Collapse the filters by default when the Filter widget is opened in a web application built using Web AppBuilder
