

## Web AppBuilder for ArcGIS v1.1 – List of Issues Addressed

---

- BUG-000083463 Web AppBuilder - Query Widget with Hebrew values does not work for hosted service.
- BUG-000083618 Truncated string.
- BUG-000083647 Web AppBuilder fails to show basemap on print output when the map contains drawing/annotating from the draw widget.
- BUG-000083712 With cached maps services as basemaps that use custom tiling schemes the measurement widget in the Web AppBuilder will show blank coordinates or NAN values when displaying coordinates.
- BUG-000083725 Web AppBuilder Print Widget fails to print legend of grouped layer.
- BUG-000083919 Web AppBuilder - Rectangle symbol fails to execute in Geoprocessing widget.
- BUG-000083962 Queries fail in Web AppBuilder if fields are date type.
- BUG-000084033 Pop-ups in Web AppBuilder are twice as wide as pop-ups in web map.
- BUG-000084041 The coded value domain descriptions display the coded value in the Web AppBuilder for Portal 10.3 attribute table rather than the description.
- BUG-000084067 Using a URL as the input to a geoprocessing service in the Geoprocessing widget within the Web AppBuilder for ArcGIS in Portal for ArcGIS 10.3 returns the error, "invalid URL".
- BUG-000084137 Editing attributes after location search in the Web AppBuilder is impossible.
- BUG-000084258 Web AppBuilder (developer version) query widget displays the coded values rather than the descriptions in the results pane.
- BUG-000084319 The pop-up menus from the ArcGIS for Server services layers in Web AppBuilder for ArcGIS persist when either the layer or the service is unchecked from the table of contents.
- BUG-000084351 Use the full itemURL instead of relative itemURL while creating new Web AppBuilder application in AGOL/Portal.
- BUG-000084481 ArcGIS Online Web AppBuilder 'Draw' and 'Measure' widgets return different measurements when utilizing an ArcGIS for server service in the New Zealand Transverse Mercator (2193) projection as a Web map basemap.
- BUG-000084493 No feature attributes are visible or editable when creating or editing points using the edit widget on a Web AppBuilder application.
- BUG-000084661 Web AppBuilder attribute table widget displays all records for a layer, regardless of filter applied to that layer within the web map.
- BUG-000084756 Adding multiple widgets at the same time creates duplicate widgets in Web AppBuilder for ArcGIS Developer Edition 1.0.
- BUG-000084771 The browser's developer tools report multiple errors at the time of creating or launching a Web AppBuilder application from Web AppBuilder - ArcGIS for Developers.
- BUG-000084824 When the attribute table is resized in the Web AppBuilder, the map itself becomes selected when using Google Chrome.
- BUG-000084983 Popups from map service layers continue to display in Web App Builder even after the layer is turned off.
- BUG-000085258 Geoprocessing widget displaying all information even if some outputs are marked to not be visible.
- BUG-000085808 Select Records in Current Page and Select Records in All Pages are no longer available in the Attribute Table widget in Web AppBuilder for ArcGIS.
  
- ENH-000083183 Please add a time slider widget to Web AppBuilder
- ENH-000084514 To be able to choose another delimiter / separator (; sign for instance) or to have another Export capacity to TXT file format with TAB delimiter.
