  - Security
    - o Set up social logins – Google, Facebook
  - Settings
    - o Enable Splash in the LocalMaps Administration
    - o Set Basemap Gallery Group
    - o Set Add Data Group

RESOLVED ISSUES:

- Fixed issue in Gallery where item thumbnails were stretched at different screen resolutions
- Fixed issue in Gallery where item descriptions were being cut off
- Fixed issue in Viewer where base maps thumbnails were not loading correctly
- Fixed issue in Viewer where icons fell below the toolbar banner
- Fixed issue in Viewer where text was obscured beneath base map thumbnails
- Fixed issue in Viewer where Layers widget was not honoring layers turned on in the webmap
- Fixed issue in Viewer IE where layers did not fit in layers panel
- Fixed issue in Admin where styles were not updating immediately
- Fixed issue in Admin where Show Borders on report tables was not working
- Fixed issue in Gallery where item metadata page was giving errors when accessed
- Fixed issue in Report where multiple records returned from a spatial intersect were being presented as one continuous table. Now, if multiple records are returned the table will highlight the start of each new feature.
- Numerous CCS fixes and UI/UX enhancements
