

## Public Safety Events and Activities

The Esri User Conference has many presentations and events with hundreds of topics covered. To help you find your way to the Public Safety, Fire/EMS, Emergency Management, Law Enforcement, Emergency Call-Taking and Dispatch, and National Security activities, we have prepared a more focused agenda.

### Esri National Security and Public Safety Summit

July 8–11, 2017 Hilton San Diego Bayfront  
Helping You Create Safer Communities

National security, law enforcement, and emergency services agencies face challenges and threats that are more complex and unpredictable than ever. Through the power of geospatial technology, organizations can now mitigate those threats through a smarter, more integrative approach to safety and security. With the right technology, data, people, and processes, every community can now become a safe community. Join us at the Esri National Security and Public Safety Summit to see the latest advances in geographic information system (GIS) technology, and learn how GIS is being applied by national security and public safety professionals around the globe. Take advantage of this opportunity to meet them, share their experiences, and network with peers working on the same challenges. Learn more at [esri.com/nss](http://esri.com/nss).

### National Security and Public Safety Social

Sunday, July 9, 5:00 PM–7:00 PM Hilton San Diego Bayfront, Promenade Patio

Leading-edge GIS users in the public safety, defense, homeland/national security, intelligence, emergency management, health, and law enforcement communities will gather to network and socialize before the weeklong conference.

### Esri Pavilion: Government Neighborhood—Public Safety Community

Tuesday, July 11 9:00 AM–6:00 PM  
Wednesday, July 12 9:00 AM–6:00 PM  
Thursday, July 13 9:00 AM–1:30 PM  
Ground Level Exhibit Hall B1, SDCC

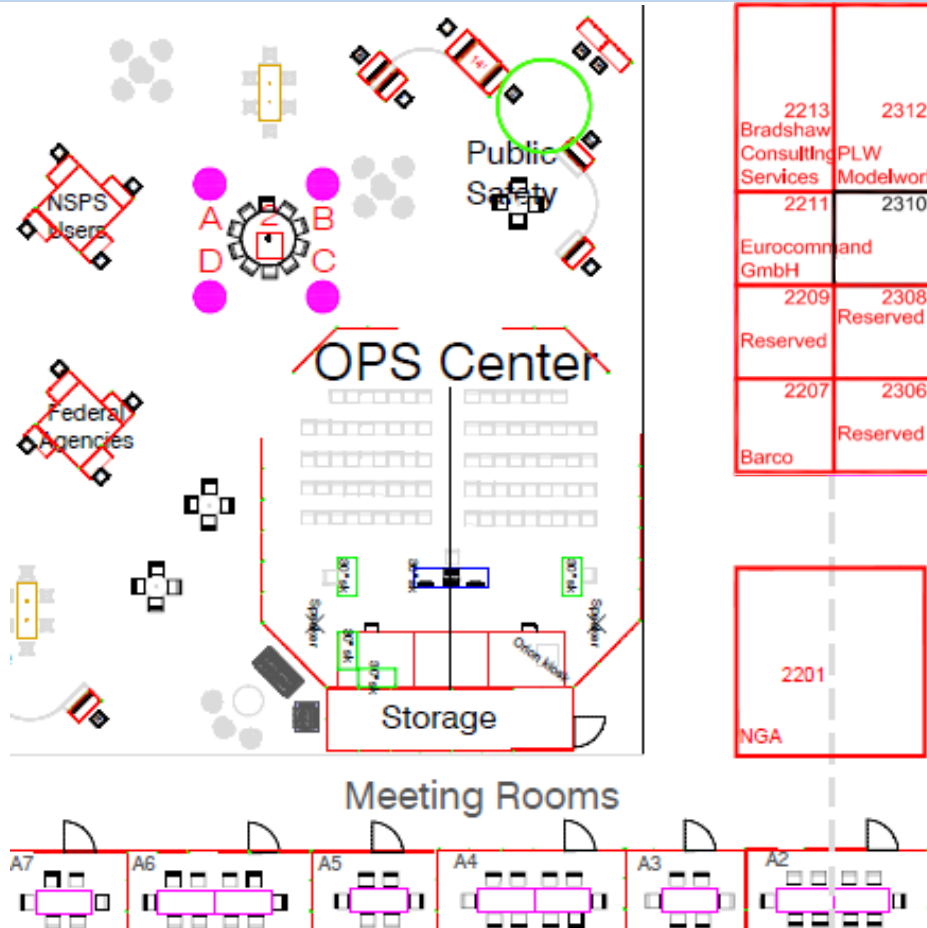

Esri is transforming how organizations solve problems and make informed decisions, leading to safer communities worldwide. The Public Safety Community will focus on geospatial solutions for emergency management, law enforcement, fire/rescue services, national security, and emergency call-taking and dispatch.

Meet your peers and learn how they are implementing the ArcGIS platform in their many missions, anywhere, any time, on any device. Representatives from Esri's Public Safety and Disaster Response teams will be on hand to advise attendees on how to leverage the power of the ArcGIS platform to create a safer community by addressing the challenges facing today's first responders. Solutions and professional services staff will be available to discuss the latest templates, applications, and workflows that have been developed in response to emerging trends in public safety, and training staff will discuss recently developed instructional programs designed specifically for the public safety professional.

Check out the Operations Platform for Safety/Security (OPS) Center Theater adjacent to our neighborhood. OPS Center presentations will illustrate Esri's vision of how web GIS enables agencies to create safer communities by improving their ability to respond to public safety and national security threats.
