GIS: Building a safe and resilient future

An ever-changing climate, shifts in demographics, increasing social unrest, and evolving terrorism tactics are placing more people around the world at risk. Every day, public safety and national security agencies face these increasingly complex and unpredictable threats and hazards head on by building safer communities. Safe communities are aware and understand risk, provide safety and security for their citizens and infrastructure, and build resilience for the new normal. Using geographic information system (GIS) technology allows a community to understand risk and plan effective mitigation strategies that maximize available resources. Join us at the Esri Safety and Security Summit (ES3) to see the latest advances in GIS technology and learn how GIS is being applied by national security and public safety professionals around the globe. Take advantage of this opportunity to meet them, share their experiences, and network with peers working on the same challenges. Learn more at esri.com/ES3.

Safety and Security Social

Sunday, July 10, 5:00 PM–7:30 PM

Hilton San Diego Bayfront, Promenade Patio

Let's take a minute to unwind and socialize before the action pack week at UC. Join us as leading-edge GIS users in the public safety, defense, homeland/national security, intelligence, emergency management, health, and law enforcement communities gather to network and socialize before the weeklong conference.

Esri Pavilion: Industry Neighborhood—Public Safety Community

Tuesday, July 12 9:00 AM–6:00 PM

Wednesday, July 13 9:00 AM–6:00 PM

Thursday, July 14 9:00 AM–4:00 PM

Ground Level Exhibit Hall B1, SDCC

Esri is transforming how organizations solve problems and make informed decisions, leading to safer communities worldwide. The Public Safety Community will focus on geospatial solutions for emergency management, law enforcement, fire/rescue services, corporate security operations, homeland/national security, emergency call-taking and dispatch, and wildland fire management.

Representatives from Esri's Public Safety team will be on hand to advise attendees on how to leverage the power of the ArcGIS technology to create a safer community by addressing the challenges facing today's first responders. Solutions and professional services staff will be available to discuss the latest templates, applications, and workflows that have been developed in response to emerging trends in public safety, and training staff will discuss recently developed instructional programs designed specifically for the public safety professional.

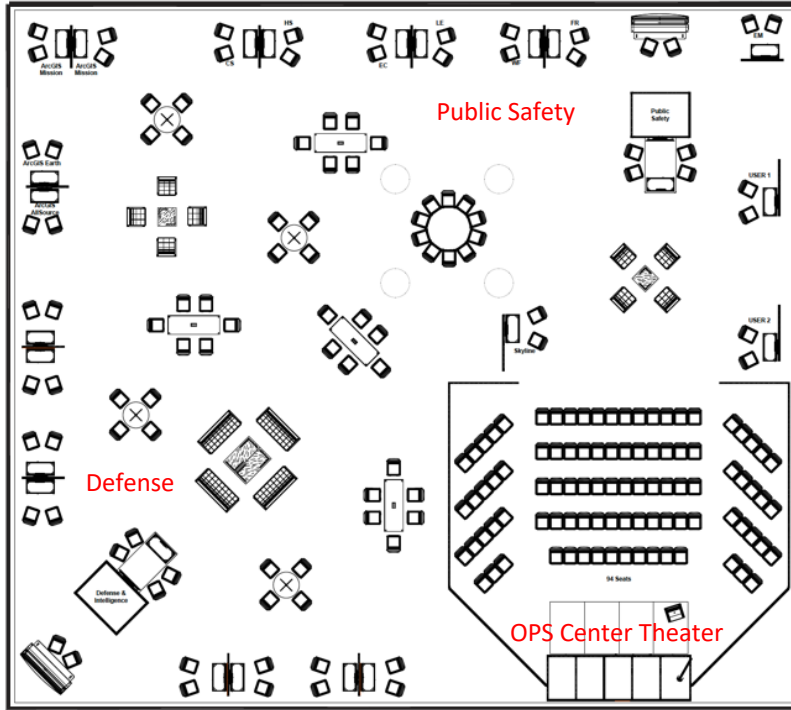

Check out the Operations Platform for Safety/Security (OPS) Center Theater adjacent to our neighborhood. OPS Center presentations will illustrate Esri's vision of how web GIS enables agencies to create safer more resilient communities by improving their ability to respond to public safety and national security threats.
