

Meet.Map.Master.

The Esri User Conference (Esri UC) brings together a global audience of Esri® geographic information system (GIS) users from across all organization sectors to learn, network, and share their experiences for five days. Find out what's new in GIS technology and data; network with your peers; and stay connected to this exciting, vibrant industry.

For the cost of one conference, you can learn software, demo new solutions, and understand different workflows and practices. Find the perfect sessions from more than 1000 available to you. Schedule a couple hours of training out of the 450 hours that are offered. There is no better way to improve your skills and learn new techniques than to take an active role in the experience of the Esri UC.

A GIS Conference Made for Experts Like You

Learn About:

- Focused solutions for your industry
- The ins and outs of the ArcGIS®
- Information on solutions from Esri, Esri partners, and startups
- How to take advantage of new technology

Visit the GIS Solutions EXPO

More than 300 exhibitors will be in attendance, alongside Esri product islands and demo theaters. Attend presentations and demos and meet one-on-one meetings at:

- Esri data health check stations
- Professional services
- Training booths

Attend Sessions

Choose from different user presentations, Esri-led technical workshops, and software demonstrations including:

- Hundreds of paper presentations from users just like you
- Road Ahead sessions that will provide insight into the direction of Esri's solutions
- Overview sessions providing a look at Esri technology you might not be using today

Network With People Who Hold Your Interest

Get the most out of your time at the conference by attending:

- Special interest groups
- Regional user groups
- Partner-sponsored events
- Industry-specific events
